

GREENSCREEN

Checklist

Greenscreen

- Make sure greenscreen is as evenly lit as possible
- If using fabric steam out the wrinkles
- No fold or wrinkles

Lighting

- Use 5600 Kelvin
- Use diffused lighting for less harsh shadows
- Light the background

Person

- no green clothing
- check under hats for green
- Check under hat for reflective sticker
- check for anything reflective as in jewelry, glasses etc
- No shadow on green screen should be present if possible
- Light the subject separately from the background

Camera Settings

- use the same Kelvin as your key lights (5600)
- minimum 60 FPS for less motion blur
- 4k 10 bit 422
- make sure shutter is double the FPS
- Use native iso if possible
- Shallow depth of field is not necessary
